INTELIFEEDER - RPS

Re-pressurizing System and Pressure Monitoring

Designed to work with you

The features of our **CONTROL SOLUTION**

Vector Industries glycol feed system monitors process pressure and responds to pressure drops from system loss or thermal contraction. Built in low and low low level sensors allow you to know when you are running out of inventory and prevents the pump from running dry.

With built in wireless communication and cloud access through the InteliVerse portal see and respond process changes rapidly

TECHNICAL INFORMATION

Part Number	Pressure Range	# of Pumps	Pump Output	Tank Capacity	Level	Alarm
VGF100-1-35-55-C-L-115	0-80 PSI	1	3.5 GPM	55 Gal	2 Dry Contacts	Light

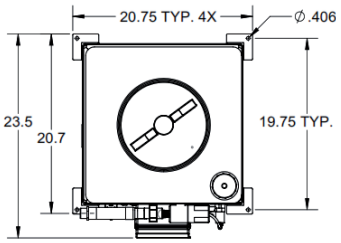
Features and benefits

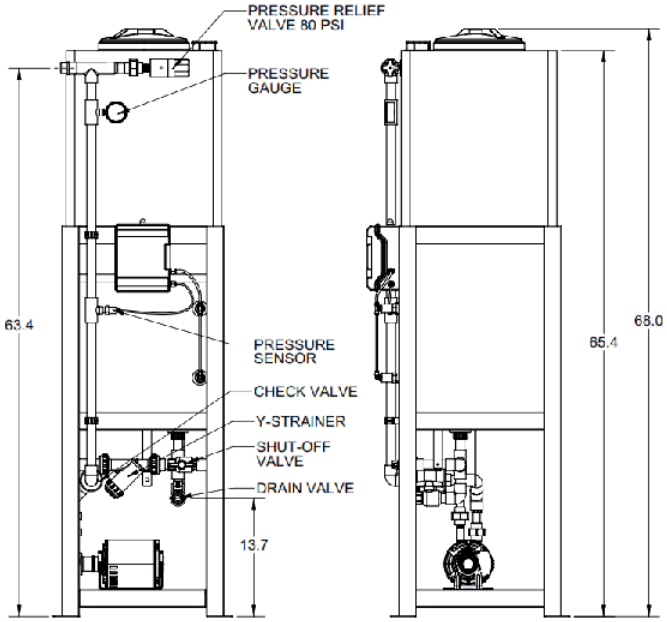
- On-board Wi-Fi Connectivity
- Easy Scan QR code for connectivity
- Cloud Access via Web Browser or Mobile App
- On-Site Access w/ Wi-Fi Direct
- Square Design to Save Floor Space
- Built-In Pressure Relief Valve (80 PSI)
- Steel Powder Coated Stand
- Built-In Circuit Breaker
- Unioned Plumbing for Easy Maintenance

Technical Characteristics

Parameter	Value
Feed Pump Type	Rotary Vane
Motor HP	1/2 HP
Motor RPM	1725
Controller Ingress Rating	IP65
Input Voltage	115VAC @ 60Hz 1pH
Max Current Draw	10 Amp/pump
Max Temperature	125 F
Dry System Weight	125 lbs (1 pump)

Dimensions





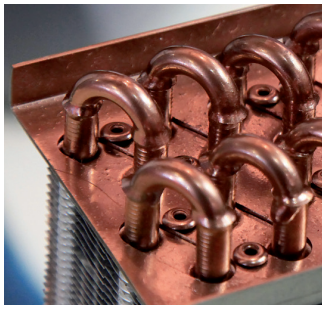
Accessories

Complete you equipment package with a cellular modem to network your controller and a transfer pump fill kit.

Part Numer	Description
Modem-Connect	Wi-Fi Modem Package
GF-55-PMP-Kit	Transfer pump package for 55 Gal

Applications

Closed Loop Make-up



Thermal Fluid Feed
